

Project Name: "M-Logo"

In this beginner's card, we learn how to create a Logo.

What is special about my project?

It is a refreshing idea to create a letter / logo that is open on one side.

This is my TurtleStitch code:

```

when clicked
  reset
  satin stitch with width 1 center
  move 3 steps
  satin stitch with width 2 center
  move 3 steps
  satin stitch with width 3 center
  move 3 steps
  satin stitch with width 4 center
  move 3 steps
  satin stitch with width 5 center
  move 3 steps
  satin stitch with width 6 center
  move 3 steps
  satin stitch with width 7 center
  move 3 steps
  satin stitch with width 8 center
  move 3 steps
  satin stitch with width 9 center
  move 3 steps
  satin stitch with width 10 center

  move 3 steps
  turn 70 degrees
  move 50 steps
  turn 220 degrees
  move 50 steps
  turn 70 degrees
  move 40 steps
  turn 90 degrees
  move 100 steps
  turn 90 degrees
  move 40 steps
  turn 90 degrees
  move 30 steps
  turn 210 degrees
  move 30 steps
  turn 120 degrees
  move 30 steps
  turn 210 degrees
  move 30 steps
  turn 90 degrees
  move 34 steps
  point in direction 225

  stop running
  repeat 6
    move 25 steps
    turn 30 degrees
  set color to red
  movement
  set color to cyan
  movement
  set color to blue
  movement

  repeat 12
    repeat 12
      move 25 steps
      turn 30 degrees
    move 1 steps
    turn 10 degrees
  
```

Description of your code:

- First, I tried to stitch the letter "M" and created the matching circles.
- Then I matched the code pieces together.
- After that, I changed the color of the different parts of the circle.
- At the very end, I changed some settings such as stitching pattern and created the expanding part of the letter "M" with it (see increasing with of satinstitch).
