## Project Name: "Name with Frame"

In this beginner's card, we learn how to stitch the letter "C" and to create a frame around it.

What is special about my project?

I liked that it was it was not too difficult. It is a special project because it is unique. The most difficult part was to create the frame around the name.

This is my TurtleStitch code:

Description of your code:

- First I created the capital letter "C".
- Then I wrote my name "Cri".
- Using a jump stitch, you can change the position of the needle without stitching along the movement. This is necessary for the later frame.
- The frame was stitched in zigzag.
- Repeat four times to create the square (frame) around the letter "C".
