## Project Name: "Ice Cream"

In this beginner's card, we learn how to stitch a simplified ice cream cone.

## What is special about my project?

I liked that we could decide for ourselves what project we like to engage in. My project is not very special. The most difficult part was to find the right angle for the cone.

This is my TurtleStitch code:

```
when Pr clicked
reset)
triple run by 10
reset
jump stitch vo
qo to }\textrm{x}:0.0)\textrm{v}=4
iump stitch O }
CIRCLE
jump stitch vO
point in direction -80 v
qo to }\textrm{x}:(-80)\textrm{v}=12
iump stitch O }
triple run by 10
qo to }\textrm{x}:(0)\textrm{y}=-18
turn 4 262 deqrees
move 300 steps
iump stitch }
qo to x: -200) y: -220
jump stitch Ox
point in direction 90 v
stop running
triple run by }1
draw text Emilia with size 30
```

## Description of your code:

- After the program starts when clicking the flag, the needle needs to move further up. Otherwise, the scoop of ice cream would be placed too far down on the stage.
- I stitched the scoop of ice cream using the block "Circle".
- Then, the needle needs to change its position again, so the cone can be stitched at the correct place. Now we stitch the cone.
- In the end, I stitched my name.
